**OPERATING INSTRUCTIONS**

**WARNING**
Read and understand this entire manual before operating this controller.

**VOLTAGE:**
120VAC; 240VAC

**Step 1:**
Apply heating product to the heated surface ensuring 100% surface contact with surface to be heated.

**Step 2:**
Position and attach bulb temperature sensor directly on top of the heater or touching the edge of the heater while also contacting the surface being heated. Temperature sensing bulb must be in close proximity of heater for accurate temperature control and to prevent over heating. Use appropriate temperature rated adhesive tape to attach bulb. If unsure what tape is appropriately rated or questions concerning your application please contact BriskHeat® factory directly at 1-800-848-7673, 614-294-3376, or bhtsales1@briskheat.com.

**Step 3:**
Plug heater into the controller’s output receptacle.

**Step 4:**
Plug the controller into an approved power source using the Input power cord.

**Step 5:**
Rotate controller knob from the “OFF” position to the desired temperature setting.
TROUBLESHOOTING GUIDE

Please read this guide prior to contacting BriskHeat®. This guide is designed to answer the most commonly asked questions. If you are unable to identify the problem or need additional assistance, please contact your local distributor or BriskHeat® at 1-800-848-7673 (U.S. / Canada), 1-614-294-3376 (World wide), or bhtsales1@briskheat.com.

Controller does not function

1. Check fuse:
   Unplug the unit from its power source. Remove the fuse located under cap on front of controller and check its continuity. If the fuse is defective, replace it with an ABC 15 amp fuse. Fuses may be obtained from most electrical supply houses.

2. Check power source:
   Using a voltmeter, test the power source and assure correct voltage is present.
